Mass Sterilization Is Legally Possible

By Nancy Matthias | Monday, October 26th, 2009 at 6:56 am

Right now, the Obama administration has the legal authority to sterilize the United States population. The necessary elements for such an undertaking were put in place without anyone in the media noticing the connections between separate Obama actions.

The Eugenics Czar

First, as Director of the Office of Science and Technology Policy, Obama appointed John Holdren, whose early research focused on population control. Together with husband and wife authors Anne Howland Ehrlich and Paul Ehrlich of Stanford, Holdren authored *Ecology: Population, Resources, Environment*. In the book, he suggested compulsory abortion and sterilization as ways of dealing with overpopulation. One method, he mused, would be to put a sterilant in the drinking water, and he was regretful that there was no such tool available or even under development. (As we shall see, this problem has been solved.)

The Manufactured Crisis

The Obama administration has been fueling a pandemic of fear with a steady drumbeat of stories about the dangers posed by the H1N1 virus, different from the regular influenza which sweeps the United States every year. It began with the report of a zero-point outbreak in Mexico:

> In late March 2009, an outbreak of a respiratory illness later proved to be caused by novel swine-origin influenza A (H1N1) virus (S-OIV) was identified in Mexico….

There followed, according to media coverage, the steady progression of the strain around the world, with breathless stories about the discovery of new cases in country after country.

Why do we call this a “manufactured crisis”? It is, quite literally. The DNA sequences of the so-called “swine flu” reveal that it is a genetically-engineered, man-made virus. That information was first reported by retired Australian virologist Adrian Gibbs, who is well-credentialed:

Adrian Gibbs …. was one of the researchers whose work was instrumental in the creation of the flu drugs Tamiflu and Relenza, and he has written or co-authored more than 250 scientific publications on viruses during his 39-year career at the Australian National University in June 2011
Canberra.

The innocuous explanation is that the virus somehow “escaped” from a laboratory. But apparently some UN scientists believe that the flu is a weaponized creation of the US military from Ft. Dietrich. That claim has some traction because the virus strain has long pre-existing parent strains and combines bird, pig, and human genes. A Canadian group headed by Dr. Leonard Horowitz has a different theory — that the virus was deployed by Big Pharma to skyrocket vaccine sales.

US vaccine manufacturers bio-terrorists? Now, nobody here is being told that the present “outbreak” of flu was deliberately engineered by a US pharmaceutical company. Baxter International Inc. were caught on the brink of starting an avian flu “pandemic,” by distributing flu vaccines contaminated with H5N1 avian flu virus to 18 countries last December.

Watch their video:

The Vaccine Scam

An adjuvant is a substance that helps and enhances the pharmacological effect of a drug or increases the ability of an antigen to stimulate the immune system (definition from MedicineNet). And the United States has purchased $484 million dollars worth of the adjuvant squalene. Squalene, a component of the anthrax vaccine given to US troops, was responsible for the host of miseries known as Gulf War Syndrome.

From Mercola:

The U.S. government has contracts with several drug companies to develop and produce swine flu vaccines. At least two of those companies, Novartis and GlaxoSmithKline, are using an adjuvant in their H1N1 vaccines. The adjuvant? Squalene.
But here’s the kicker. Besides the “arthritis, fibromyalgia, lymphadenopathy, rashes, photosensitive rashes, malar rashes, chronic fatigue, chronic headaches, abnormal body hair loss, non-healing skin lesions, aphthous ulcers, dizziness, weakness, memory loss, seizures, mood changes, neuropsychiatric problems, anti-thyroid effects, anaemia, elevated ESR (erythrocyte sedimentation rate), systemic lupus erythematosus, multiple sclerosis, ALS (amyotrophic lateral sclerosis), Raynaud’s phenomenon, Sjögren’s syndrome, chronic diarrhoea, night sweats and low-grade fevers” typical of the Gulf War Syndrome, squalene has one other notable effect — sterilization.

From Health Freedom USA:

…patents show that high doses of squalene cause permanent, irreversible sterility in the presence of proteins with sugars attached to them (glycoproteins). The human body is very rich in glycoproteins, which serve as cell receptors, cell-to-cell signalling molecules such as hormones and many other molecules. The probable result of widespread squalene-laced vaccine use is mass sterility.

The National Emergency

With the declaration of a national emergency, Obama has given the Department of Health and Human Services the authority to forcibly vaccinate the population of the United States. Citizens can be rounded up and forced into internment camps under the guise of quarantine, and effectively sterilized.

Quod erat demonstrandum.

Might the rightwing extremists, as defined by the Department of Homeland Defense, be the first patients selected? Perhaps even ahead of the mentally ill and the disabled?

Listen to Congressman Ron Paul on the subject:
